PERFECT TECHNOLOGY ALIGNMENT

GOALS

OUR MISSION

Based on years of experience in design of systems, we strive to fulfill each customer's requirement with the latest technology. Indeed, the business is relationship orientated and does not serve the mass markets.

Orion Audio Visual does not compete in the end user's market but rather supports their authorised dealer channels. Our mission is to ensure that solutions are technically sound & executable. This may include drawings as well as bill of materials for the customer.

OUR VISION

- **To fulfil** our customer's requirements and serve them as if it's our own company.
- **To grow** the market share of each brand we represent.
- **To be a leading distributor of world class brands.**

DISTRIBUTE

We distribute various high-end products such as Audio visual control systems, Digital conference systems, pro-audio products and quality wireless presentation technology.

DESIGN

Based on years of experience in designing of systems, we strive to fulfil each customer's requirement with the latest technology and expertise.

OUR BRANDS

Aurora Multimedia products incorporate state-of-the-art technologies that surpass typical specifications and features. They design and manufacture products for today's AV solutions, with integrators and their customers' budgets in mind, and they take pride in their products. That's why they offer a minimum 3-year warranty on all products, and a 5-year warranty on the IPX-TC3 Series, VLX-TC1-CF, HT Series, and RX Series.

Advanced AV processors with scaling, multi-image rotation, and dual/quad display processing only add to their highly adaptive, diversified product line. Aurora products provide solutions for a variety of global markets, including government, education, security, hospitality, corporate, and house of worship.

Avonic bring innovations to the AV industry and have introduced unique, high-quality audiovisual recording solutions for many hundreds of different applications. Avonic products consists of the provision of PTZ cameras for markets including education, government, healthcare, places of worship, video conferencing, webcast studios and webinar studios.
